

Installation Of i-Memorize

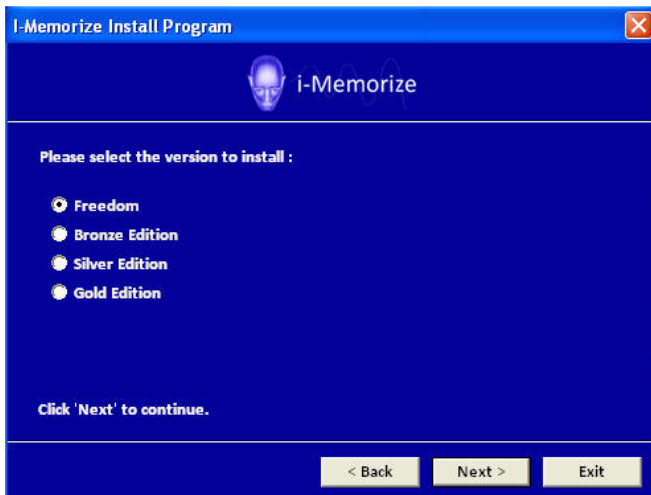

i-Memorize-SetUp.exe

From the installation DVD or the files downloaded for installation select this file and run it

You will be greeted by the 'Welcome' screen.

Click 'Next'

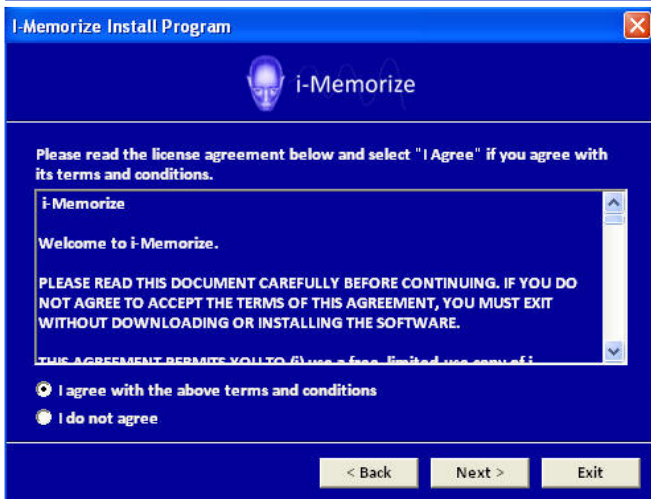

Select the version of the software that you are installing.

NOTE: In order to install the Bronze, Silver or Gold Editions you MUST purchase a license from i-Memorize.

The Freedom version is a fully functional 30 day trial.

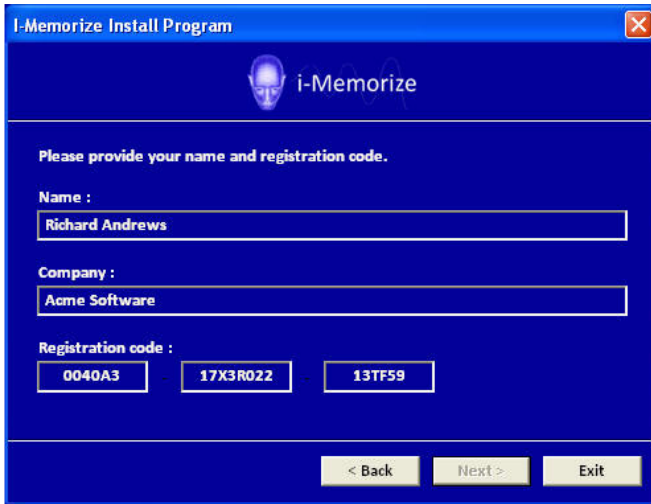

Click 'Next'

Read the license agreement and, if you agree with its terms, select 'I agree with the above terms and conditions'

Click 'Next'

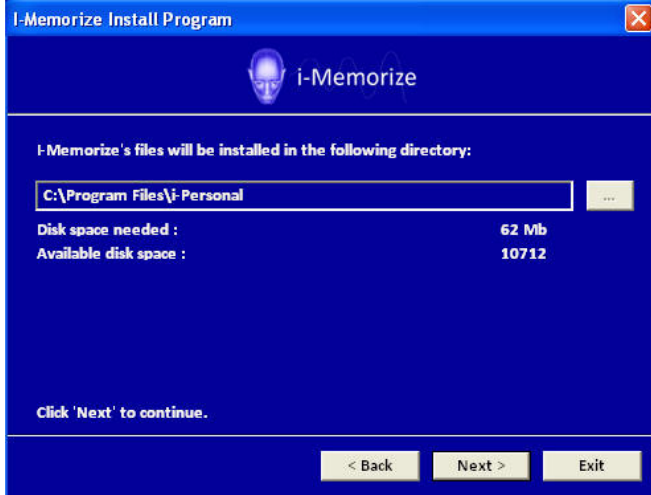

Enter your Name and, if appropriate, your company and then enter the License Registration Code for the version you are installing.

Licenses for the 'Freedom' version can be obtained from:

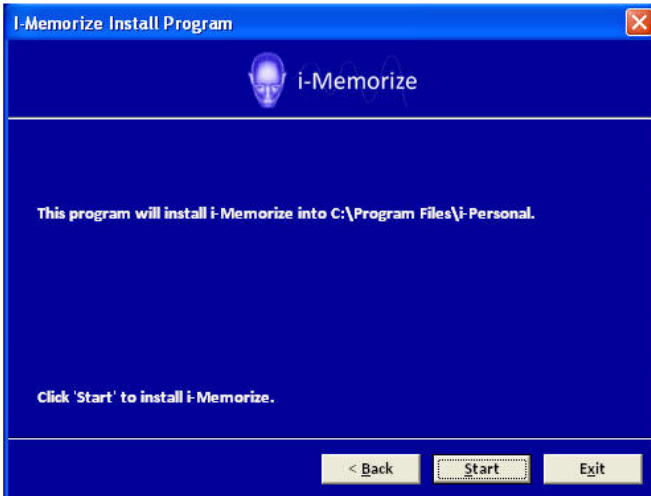

<http://www.i-memorize.com/licensing>

Click 'Next'

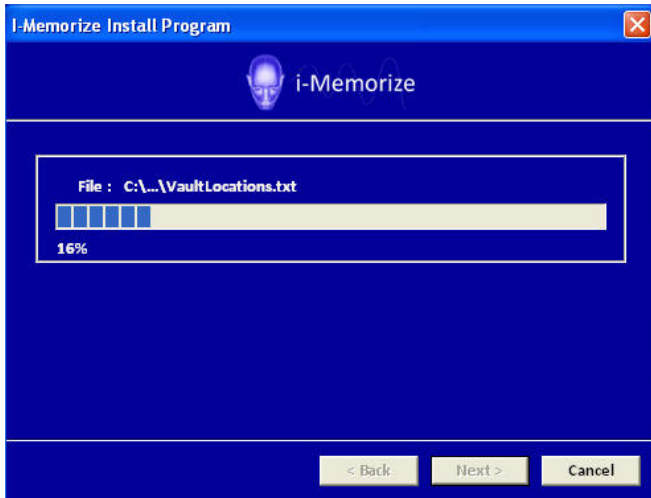

Select the installation directory

Click 'Next'

Confirmation screen.

Click 'Next'

i-Memorize will be installed in the location you selected

ADD USER

PLEASE NOTE: THIS PROVIDES ACCESS TO ALL DATA STORED IN THE SYSTEM. ** IT IS ESSENTIAL THAT YOU REMEMBER THIS USER NAME/PASSWORD COMBINATION OTHERWISE YOU WILL BE DENIED ACCESS TO YOUR DATA **

User name

Password

Confirm Password

Personal EditionRevision 2.0.6

Once i-Memorize is installed you will be presented with a screen to define your Username and Password.

This can be your choice but you should make both your Username and Password at least 8 characters in length to ensure a higher level of security for the information you store in i-Memorize

PLEASE NOTE:

IT IS IMPERATIVE THAT YOU REMEMBER BOTH THE USERNAME AND PASSWORD FOR THE i-Memorize USER YOU DEFINE.

IF YOU ENTER THESE INCORRECTLY WHEN LOGGING IN TO i-Memorize YOU WILL BE DENIED ACCESS TO YOUR DATA

SET UP VAULTS

PLEASE NOTE: The location of Vault1 MUST be specified. All locations can be changed after installation of i-Memorize if necessary

Primary Vault Location

Secondary Vault Location

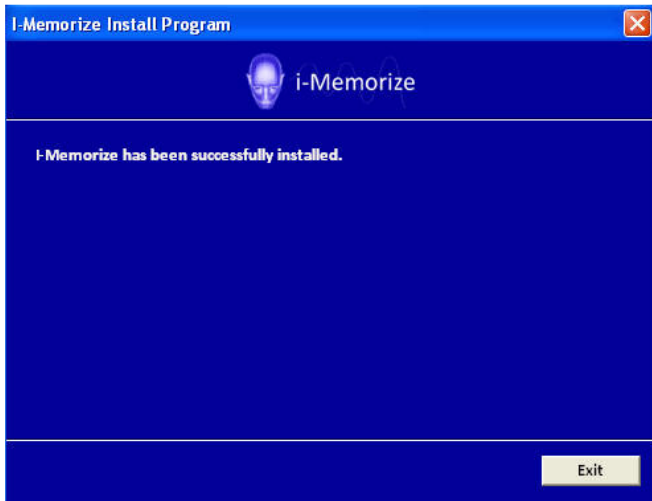

Tertiary Vault Location

Personal EditionRevision 2.0.6

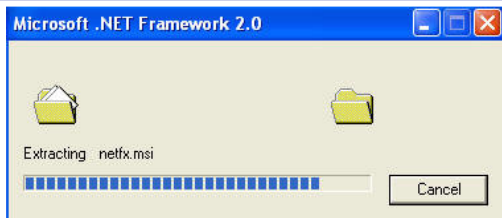

Next you will be presented with a panel to enable you to set up the Vault locations.

Although i-Memorize will operate with a single Vault location it is strongly suggested that you define all three locations, each residing in a different physical device (separate hard drives etc). This is to ensure that you will not experience any data loss in case of a hard drive failure.

It also enables i-Memorize Triple-Sec security to operate at maximum effectiveness to safeguard your information

This screen will confirm successful installation of the software

If Microsoft .NET Framework is not detected during the installation it will be installed after i-Memorize has been installed.
